DAY 6: Cruising the Iron Gates, Donji Milanovac, Golubac

Today's main attraction will be the spectacular scenery along the Danube, as you cruise a stretch of gorges known as the Iron Gates. Later, head ashore to explore a Paleolithic site and an extraordinarily well-preserved medieval fortress. All along the way, history lines the banks of the river. Keep an eye out for Trajan's Plaque, which the ancient Romans erected to commemorate the road they anchored in the steep cliffs above the water, and Golubac Castle, built in the 14th century and attacked successively by the Serbs, Magyars and Turks.

The **Belogradchik Rocks** are a group of strangely shaped [sandstone](#) and [conglomerate](#) rock formations located on the western slopes of the [Balkan Mountains](#) near the town of [Belogradchik](#) in northwest [Bulgaria](#). The rocks vary in color from primarily red to yellow; some of the rocks reach up to 200 m in height. Many rocks have fantastic shapes and are associated with interesting legends. They are often named for people or objects they are thought to resemble. The Belogradchik Rocks have been declared a Natural Landmark by the Bulgarian government and are a major tourist attraction in the region. This is the only habitat of the critically endangered Bulgarian endemic plant [Hieracium Belogradcense](#)

Featured Excursion: Lepenski Vir archaeological park and Golubac Castle

Unwind onboard as you cruise the breathtaking Iron Gates, an 83-mile-long (134-kilometer-long) stretch of scenic gorges that were cut through the Carpathian and Balkan Mountains over eons by the Danube River. These gorges, which act as a natural border between Serbia and Romania, are among the most dramatic and beautiful sights in all of Europe. This was one of the swiftest and most dangerous stretches of the river before two dams were built: Iron Gate I and Iron Gate II. Construction on the dams began in 1964 and took 20 years to complete; they have dramatically altered the area's landscape, raising the water level by 114 feet (35 meters) and drowning several islands and villages.
